

Drayage Truck Registry Label Sample Packet

Labels are issued to truck owners by request during truck registration in the Drayage Truck Registry (DTR). Labels are optional and the absence of a label does not reflect a truck's compliance status.

Label Facts

- Labels are not issued to trucks with Pre-1994 model year engines.
- Labels are not issued to trucks with 1994-2003 model year engines without installed level 3 PM retrofits.
- Labels must be affixed to outside truck driver's door.
- A label is not valid if:
 - It is laminated
 - It is affixed with anything other than the label's original adhesive (e.g. scotch tape, duct tape, magnet backing, etc.)
 - It is removed, altered, or placed on incorrect vehicle

Security Features

- Background on label front is reflective.
- Label fractures easily when removed.
- Each label number and barcode is assigned to a specific truck. A truck / label combination can be verified through the drayage truck registry.
